

# Asia-Pacific Symposium for Lattice Field Theory (APLAT 2020)

## Thursday, 6 August 2020

### Standard Model Parameters and Renormalisation: Session 6-1 A (14:00 - 15:40)

-Conveners: Yasumichi Aoki

time	[id] title	presenter
14:00	[15] Determination of the charm quark mass from $N_f = 2+1$ QCD with Wilson fermions	BOUMA (*), Sjoerd
14:20	[22] Determination of $\alpha_s$ in $N_f=3$ QCD from current-current correlation functions in position space	CALÌ (*), Salvatore
14:40	[49] Renormalisation of quark and gluon operators using Feynman-Hellmann	HOWSON (*), Tomas
15:00	[51] QCD sum rule from lattice correlators	ISHIKAWA (*), Tsutomu
15:20	[105] A non-perturbative renormalization scheme with the gradient flow	RIZIK (*), Matthew
