

**Probe into core-collapse  
SuperNovae via  
Gravitational-Wave and  
neutrino signals  
(SNeGWv2021)**

Wednesday 01 December 2021 - Thursday 02 December 2021  
on-line (via Zoom)

**Book of Abstracts**

# Contents

|                                                                                                                     |   |
|---------------------------------------------------------------------------------------------------------------------|---|
| 3D Simulations of Rapidly Rotating Core Collapse: Gravitational Waves and Neutrinos . . . . .                       | 1 |
| Axion-like Particles from Core-collapse Supernovae . . . . .                                                        | 1 |
| Core collapse supernovae: connecting theories, simulations, and observations . . . . .                              | 1 |
| Current status of KAGRA . . . . .                                                                                   | 1 |
| Development of collective fast neutrino flavor conversion . . . . .                                                 | 1 |
| Equation of State from Color-Molecular Dynamics . . . . .                                                           | 1 |
| Gravitational wave analysis for long-term 3D CCSN simulations . . . . .                                             | 1 |
| Gravitational wave asteroseismology and universal relations . . . . .                                               | 1 |
| Influences of Nuclear EOS on Core-collapse Supernova Simulations by the Boltzmann-radiation-hydrodynamics . . . . . | 2 |
| Long term behavior of supernova neutrino light curves . . . . .                                                     | 2 |
| Monte Carlo neutrino transport with collective oscillations & scatterings . . . . .                                 | 2 |
| New modules of Super-Kamiokande for super nearby supernovae . . . . .                                               | 2 |
| Observing Supernova Neutrino Light Curves with Super-Kamiokande . . . . .                                           | 2 |
| Pre-Supernova Alert System for Super-Kamiokande with Gadolinium . . . . .                                           | 2 |
| TBA . . . . .                                                                                                       | 2 |

**Supernova simulation (chair: Kohsuke Sumiyoshi) / 4**

## **3D Simulations of Rapidly Rotating Core Collapse: Gravitational Waves and Neutrinos**

**Neutrino oscillation and beyond (chair: Akira Harada) / 16**

## **Axion-like Particles from Core-collapse Supernovae**

**Supernova simulation (chair: Kohsuke Sumiyoshi) / 3**

## **Core collapse supernovae: connecting theories, simulations, and observations**

**Gravitational waves (chair: Kei Kotake) / 6**

## **Current status of KAGRA**

**Neutrino oscillation and beyond (chair: Akira Harada) / 15**

## **Development of collective fast neutrino flavor conversion**

**Supernova and EOS (chair: Tomoya Takiwaki) / 9**

## **Equation of State from Color-Molecular Dynamics**

**Gravitational waves (chair: Kei Kotake) / 5**

## **Gravitational wave analysis for long-term 3D CCSN simulations**

**Supernova and EOS (chair: Tomoya Takiwaki) / 8**

## **Gravitational wave asteroseismology and universal relations**

**Supernova and EOS (chair: Tomoya Takiwaki) / 7**

## **Influences of Nuclear EOS on Core-collapse Supernova Simulations by the Boltzmann-radiation-hydrodynamics**

**Supernova neutrino prediction (chair: Yusuke Koshio) / 12**

## **Long term behavior of supernova neutrino light curves**

**Neutrino oscillation and beyond (chair: Akira Harada) / 14**

## **Monte Carlo neutrino transport with collective oscillations & scatterings**

**Supernova neutrino observation (chair: Mark Vagins) / 11**

## **New modules of Super-Kamiokande for super nearby supernovae**

**Supernova neutrino prediction (chair: Yusuke Koshio) / 13**

## **Observing Supernova Neutrino Light Curves with Super-Kamiokande**

**Supernova neutrino observation (chair: Mark Vagins) / 10**

## **Pre-Supernova Alert System for Super-Kamiokande with Gadolinium**
