

8th International Conference on Quarks and Nuclear Physics (QNP2018)

Wednesday 14 November 2018

14B3 Hadron Spectroscopy (Light Baryon) - Room 402 (15:50-17:40)

time	[id] title	presenter
15:50	[86] From hadrons at unphysical quark masses to coupled-channel reaction dynamics in the laboratory	LUTZ, Matthias F.M.
16:20	[78] Beam-asymmetry measurement in pion-photoproduction on the neutron at CLAS	SOKHAN, Daria
16:40	[79] Spin observables, Σ and G in charged pion photo-production from polarized neutrons in solid HD at Jefferson Lab	KAGEYA, Tsuneo
17:00	[80] Lattice calculation of nucleon form factor at physical point	SHINTANI, Eigo
17:20	[81] Study of dark matter from lattice gauge theory	IIDA, Hideaki
