

ISRD2018 : International Symposium on Radiation Detectors and Their Uses

Wednesday, 24 January 2018

Fukushima - Kobayashi hall (14:50 - 16:10)

time	[id] title	presenter
14:50	[26] O23: Preliminary study on determination of surface contamination density on soil in heavily contaminated areas using a CeBr ₃ scintillation detector coupled with lead shielding	KOWATARI, Munehiko
15:10	[27] O24: Development of remote sensing technique using radiation-resistant optical fibers under high-radiation environment	ITO, Chikara
15:30	[28] O25: Laser cooling and spectroscopy of trapped Sr ions	IWATA, Yoshihiro
15:50	[29] O26: Comparing of Gamma Ray Visualization Analyzer's Quantitative Performance with Survey Meter's Dose Rate's one	UESAKA, Akio
